

AUTOMATED SINGLE CAR TEST DEVICE

DECEMBER, 2000

Recent changes to S-486 have eliminated the Repair Track Test and standardized the Single Car Test.

We are informing all ASCTD users to use only the "Single Car Test" option and not the "Repair Track Test" option as of January 1, 2001, the effective date of the new S-486.

We will be updating and sending out the new software for the ASCTD to eliminate the "Repair Track Test" in the very near future.
